### W. C. T. U. COLUMN. Motto: "God and Home and Native Land."

Very calmly and quietly men reply, when we speak of a prohibitory law, "It cannot be enforced." What does that mean? Anarchy. If a majority loon. He had expected to get away beof voters say that liquor shall be outlawed, and we can not outlaw it, the meaning is that there is a power greater than the people's will-that there is a monopolist greater than Vanderbilt or Gould - one that muzzles the press and boycott the home. It means that the greatest capitalist in this country is the liquor capitalist, and that we are willing to stand by and let it have control. Shall we then rivet the chains by the apathetic citithat they can not be east off; shall we rivet these chains still more tightly by a high license decree, which brings more money than before into the coffers of our masters? Woe unto them that call evil good and good evil, who darkness.

The Twilight Club of New York City has recently discussed "Sunday and the Saloon." We quote some of the points: "The saloon is not an American institution; ninety per cent of the saloon keepers are foreigners; there is a growing prejudice to employing sober men even to attend the bars. It is absurd that a man can not draw up a legal contract on Sundays while the saloon-keeper is permitted to open and pursue his business. The saloon is born of the devil, and is a menace to society. The alleged right to sell liquor and create drunkards who commit crimes is preposterous. The saloon is called the poor man's parlor, but the fact is, that except for the demoralizing influence of the saloon the poor man might have a parlor of his own." We are very sorry to say that a majority of the speakers seemed, in spite of all points made against it, to favor a continental rather than an American Sabbath. One of the worst results of foreign travel is the un-Americanizing of our people.

The motto of the proprietors of Dr. Henry Baxter's Mandrake Bitters is, "the greatest good to the greatest number," and so sell a large bottle of a valuable remedy for the small price of 25 cents, and warrant every bottle to give satisfaction or money refunded.

What do you know about the Indians now? I do not mean what they did when the first settlers were stealing their lands and they were murdering white men, in return, but what they are doing and what we are doing in 1892. Here is one part of the story. The Utes, numbering about 650, live in Colorado. In 1880 our government promised them lands, horses, tools, schools and money. These promises have been broken, like so many others that have been made to our redskinned brothers. And now because white men want the land where these Indians are living, there is talk of taking them away from their homes, and moving them into the mountains of Utah, where the only way they could live would be by their old savage habits of hunting. It is a shame! You boys and girls cannot yet vote, but you can talk, and I hope you will. Will you ask older people to be fair and honest to the Indians? And you can pray. Will you pray that our government may treat the Indians justly?

One of the first women who was assigned work in the treasury building was a colored woman, Sophie Holmes by name. One night when Sophie was sweeping the refuse papers in her room she found a box of greenbacks that had been cut, counted and packed to transfer to the vaults and had been overlooked. She did not dare call the watchman for fear he would be tempted beyond resistance. She thought of her four small children at home alone with no one to give them their supper or put them to bed, but the one duty that stared her in the face was to protect that money; she sat down upon the box and quietly waited for the hours to go by. At 1 o'clock in the morning she heard the shuffling step of General Spinner in the corridor and heard him open the door to his room. She quietly slipped along the corridor, knocked at his door and told him what she had found. The General had the box taken to his room and sent Sophie home in his carriage. The next morning after she returned she found the General still keeping guard. That night he sent for her and placed in her hand her appointment papers, given for nonesty, and for thirty years she has drawn her \$50 per month. Fifty thousand dollars was in that box. At anther time she found \$80,000, for which the testimony can be seen over eneral Spinner's own handwriting. How's This ?-We offer one hundred dollars eward for any case of Catarrh that cannot be ured by Hall's Catarrh Cure. F. J. CHENEY & CO., Toledo, O.

We, the undersigned, have known F. J. ency for the last 15 years, and believe him rfectly honorable in all business transactgations made by their firm. est & Truax, Wholesale Druggists, Toledo,

He Will Attempt to Sail Across the

Country in Three Days. Robert J. Woodward, a farmer of Ventura county, is preparing to sail from San Diego to New York in a balfore this, but had trouble with the gas company about the gas to fill his airship, and he may be detained several days.

Mr. Woodward is an enthusiast on the subject of aerial navigation, and for ten years has given the question the most exhaustive study. In the theory of the navigation of the atmosphere he is perhaps as well posted as any man living. but in practice he is a novice, never having made an ascension.

On account of the mountains being lower here than in the north, and also zens' confession, so strong already of there being nearly always a westerly breeze in this part of the country, Mr. Woodward decided to honor San Diego with his presence, and make it his point of departure, with what degree of success, however, remains to be seen.

He arrived in this city about two weeks ago, and while awaiting the arput darkness for light and light for rival of his balloon has busied himself studying the air currents and preparing a peculiar apparatus, which he proposes

to attach to his inflated globe. He proposes by adding two huge white wings to the balloon to sail whither he will, ascending and descending at pleasure. The wings are about 8 by 6 feet, and are spread upon a bamboo pole about twelve feet long, having two branches from the main pole, one on either side, and four crosspieces. The wings were of strong though light weight canvas, sewed to each piece of the frame.

By working the wings as one would a pair of oars in rowing, the inventor claims to be able to control his movements. At any rate, he has such confidence in his ability to do so that he has not only spent much money on the invention, but proposes to risk his life

The balloon is 36 by 26 feet, is capable of lifting 400 pounds and cost \$600. It requires 11,000 feet of gas and about fifteen hours is the time necessary to inflate it. Mr. Woodward caused to be erected a canvas screen about forty feet in height on a vacant lot, where he made getting water into the balloon after letting in 200 feet, he decided not to take any risk, but obtain the gas from the gas works. Accordingly the valve was opened and the gas released.

Although having no idea of the height he will have to reach, Mr. Woodward expects to obtain an altitude of 10,000

If successful in striking the current he expects to, he says it is not impossible to reach the Atlantic coast in thirtysix hours. He, however, does not expect to travel so quickly, and will take sufficient provisions for a three days trip, which, he said, in case of necessity, would last him six days.-San Francisco Examiner.

Brief Rules for Cases of Emergency.

If the child is suddenly attacked with vomiting, purging and prostration, send for a doctor at once. In the meantime put the child for a few minutes in a hot bath, then carefully wipe it dry with a warm towel, and wrap it in warm blankets. If its hands and feet are cold. bottles filled with hot water and wrapped in flannel should be laid against them.

A mush poultice, or one made of flaxseed meal, to which one-quarter part of mustard fiour has been added, or flannels wrung out of hot vinegar and water should be placed over the belly.

Five drops of brandy in a teaspoonful of water may be given every ten or fifteen minutes; but if the vomiting permilk and limewater.

If the diarrhoea has just begun, or if it is caused by improper food a teaspoonful of castor oil or of the spiced sirup of rhubarb should be given.

If the child has been fed partly on the breast and partly on other food, the mother's milk alone must now be used. If the child has been weared it should have pure milk, with limewater, or weak beef tea, or chicken water.

The child should be allowed to drink cold water freely.

should be at once removed from the room, but saved for the physician to examine at his visit.-Manley Tempest, M. D., in New York Commercial Advertiser.

Cold Water Killed Him. In a small house of the Rue Ste. Marguerite, Paris, there has lived for a long time past a crippled old beggar known in the quarter as "The Terrible Savoyard." One morning recently he left his lodgings as usual to offer pencils to the charitably inclined, and when he arrived at the wineshop of the Rue Basfroy, where he was known, he began to tease the housemaid, Clemence Pruvost. The girl, not relishing his attentions, retorted, "If you had watered your wine this morning you would be less troublesome," and threw a glass of water in his face. The old man sprang forward with an insult on his lips, but suddenly staggered back and fell down dead. The doctor summoned in haste to the spot It is the time and likewise the hour for the declared the cause of death to have been | full and complete enjoyment of fish dinners. conjection of the brain, produced by the unexpected cold aspersion.—Pall Mall

Ducks, moreover, can fly by night, while pigeons cannot. Major Allott thinks that sea gulls might be trained also for message bearing purposes,-London News.

JUST FOR FUN.

A man may run in debt, but he seldom comes out anything faster than

Lord A.-Don't you think you ought to call me Dear? His American wife-Yes; at any price.

Charles, I am trying as hard as I can, darling, to get ahead. Clara-Well, the Lord knows you need one badly enough.

Tourist - Have you any alligator satchels here? Florida Merchant-N-n-o; the alligators hain't got to usin' 'em down here yit.

Aeronaut (just alighting on church spire)-I'd like to have hold of the fellow who said there was plenty of room at the top.

Love laughs at locksmiths, she said to him, encouragingly. Yes, darling, I know, he replied sadly, but not at No. 11 boots.

"Oh, Wadsleigh, which way?" "Going down to have a pair of trousers pressed." "Trousers pressed? Where are they?" "Sh! Got 'em on!"

Cowbigger-I haven't any change this morning. Just chalk it up. Milkman-That's too much to ask. I can't afford to waste my chalk that way.

A Forcible Argument-Suitor (persistently)-Why do you keep me waiting so long for an answer? Remember that you are growing older every min-

Mamma-Which of the children hid my slippers? Nurse-Little Johnny hid 'em, ma'am. Mamma - Then Johnny is the one who upset the jam down stairs.

She-I know I'm cross at times, John, but if I had my life to live over again, I should marry you just the same. He-I have my doubts about that, my dear.

Would you like some garden hose? said the clerk in the general supply store. No, thanks, was the answer; an attempt to fill it. Being afraid of I ginally go in barefooted to do my weedin'.

> At the Seashore She-Are you fond of driving? He (from the dress goods department)-Indeed, I am. Holding the ribbons is my favorite occupation.

It was a great judge of whom another English judge said, infuriated by his self-satisfied aspect, "There 'e goes, the old 'umbug,'umming a 'ymn. Ow I ate 'im!"

Sister-I don't think that girl you're engaged to is very pretty. Brother-She is beautiful when she smiles. Sister-Yes, but she won't do much smiling after she marries you. A Western girl who married a dull

English lord, thus described her daily life: "It is nothing but violet, velvet and veal one day, and mauve, moire and mutton the next." Yaas, said Cholly Chuggins, I be-

lieve in a man's having one idea in life, you know. Do you really, rejoined Miss Bell Pepperton, and when do you expect to have yours? Well, John and Laura will graduate

soon. Have they learned anything? You bet. John can umpire a game without gittin' licked, and Laura's way ahead of her class in croquet!

Mrs. Foster - My dear, will your sists give this brandy in equal parts of business permit you to go away with me this summer? Mr. Foster-Eh-no. The truth is, I'm afraid my business will compel you to stay at home with

"Hawkins is very fond of his horse, isn't he?" "Why, no; he hates him." "That's queer. I saw him riding in the park the other day, he had his arms around the animal's neck."

She-There's no poetry in a kiss. It is like a trunk. He--Like a trunk? The soiled diapers or the discharges She-You can always find a man to express it, and it is wiser to check it if you don't want it to go too far.

> Newgrad-Do you know, I find that my university education goes against me in my endeavors to get on in the world. Cynicus - Well, why do you tell people that you have it. They would never find it out if you didn't mention it.

When Daby was sick, we gave her Castoria. When she was a Child, she cried for Castoria. When she became Miss, she clung to Castoria. When she had Children, she gave them Castoria
